

Introduction

About Myself

I'm obligated to be a part of GirlScript. My name is **Yash Chauhan**. I'm a second-year Computer Science Student. Being a Computer Science Student I am Good at programming languages like c, c++ & c#. I am fascinated with other technologies like Virtual Reality(VR), Augmented Reality(AR), Game Development, Web Technology all my projects are based on these technologies.

Apart from this, I'm a Microsoft Student Partner and Unity Student Ambassador. I have built my projects on Game Development, Web Development, IoT, and AR/VR technology.

I've represented our university at different National level Competitions, Hackathons, Summits more than 27 times, and added to the achievements of our University.

My Vision towards the community:

I strongly stand by the Community vision of inculcating university students. I believe our efforts would go even farther if we exclusively aim at growing the community by encouraging students to enroll in the community. Escalating apprehension about technology would revitalize the community.

Unity Engine

Install the unity hub and after installing unity hub and then goto to

The image shows two screenshots related to Unity. The top screenshot is the Unity website's download page. It features a navigation bar with links like 'Products', 'Solutions', 'Made with Unity', 'Learning', and 'Support & Services'. The main heading is 'Download Unity', followed by a welcome message and instructions to choose a version. There are two green buttons: 'Choose your Unity + download' and 'Download Unity Hub'. Below these is a link to 'Learn more about the new Unity Hub here.' The 'Download Unity Beta' section is also visible. On the right, 'System requirements' are listed for OS (Windows 7 SP1+, 8, 10, 64-bit; Mac OS X 10.12+; Ubuntu 16.04, 18.04; CentOS 7) and GPU (Graphics card with DX10 (shader model 4.0) capabilities). A 'Learn more' button is present. The 'Resources' section lists links for LTS Releases, Older versions of Unity, Unity 2019.3 upgrade guide, Patch releases, Release notes, Engine features, and Unity User Manual. The bottom screenshot shows the Unity Hub 2.3.0 application window. The 'Installs' tab is active, displaying a message: 'No Unity version. To be able to start working add a Unity version or locate an existing one on your disk.' There are 'LOCATE' and 'ADD' buttons at the top right of the main content area.
